Baby Boomers & Millennials: Writing the Next Chapter

presented by
The Institute of Medical Science

**WEDNESDAY, JUNE 8, 2016
ISABEL BADER THEATRE
UNIVERSITY OF TORONTO**

Programme

BACKGROUND

Over the next 10 years as the Baby Boomer generation ages, the way we care for older adults will drastically change. UofT Talks will join esteemed faculty members from across the UofT School of Graduate Studies and the greater Toronto community to explore the vital connection between Boomers and Millennials and how these two generations will work together to translate challenges into opportunities and shape the future of society, healthcare, the economy, and technology.

ABOUT US

The Institute of Medical Science (IMS) at the University of Toronto is a graduate program that focuses on translational research and interdisciplinary education that advance human health. It offers a wide range of research-intensive, thesis-based graduate degrees and professional master's programs in basic and clinical medical science. The IMS is home to world-calibre graduate supervisors conducting research in teaching hospitals, research centres, and basic science departments throughout Toronto. The IMS is poised to become a global leader in graduate education to improve human health through translational research.

At the Institute of Medical Science, we understand that the success of our graduate students is not only a result of the academic training they receive while in our program, it is also dependent on the relationships they cultivate and their experiences beyond the classroom and the lab. The IMS Student, Alumni, and Faculty Engagement Committee (SAFE) serves to connect all members of the IMS to foster an engaged community in order to create a more complete learning environment that places importance on the academic, professional, social, emotional, and mental well-being of our students.
